Any out-of-state vehicles? No If so, how many? From what states?

Any lines of customers (inside and/or outside)? No customers were in line, but there were approximately ten customers waiting for prescriptions to be filled. If yes, what are the general ages of the customers? The ages of the customers were varied, with nothing obvious or out of the norm.

Any signs about Mallinckrodt products? None If yes, what do they say?

Other observations: I spoke with the pharmacist, Ken and explained that I represent Mallinckrodt and was attempting to determine where our Oxycodone products were

being dispensed. He advised Lam's fills only prescriptions for those in the immediate and surrounding zip codes and runs PMP reports prior to filling any prescriptions. The PMP report shows the customers recent prescriptions and where they were filled which reduces the opportunity for doctor and pharmacy shopping. Also, there was a sign stating all customers must show a valid in state drivers license to have a prescription filled. Another sign indicated the pharmacy has a Compliance Team Incorporated certification.

It should be noted that the pharmacy is near the University of Nevada, Medical and Trauma Center. Also, it was noted there were a number of other pharmacies in the area to include: CVS; Southwest Medical Pharmacy and Value Medical.
